Website Proposal

Project: Company Portfolio Website for Alora Creatives.
From: AlexanderS

Hello Alora,

Thanks for the chance to work on your company's website. I'm really excited to build something clean, fast, and professional for your agency.

To be upfront — this is one of my first paid projects, and I'm committed to delivering solid work that reflects your brand and helps you stand out online. I'm aiming to create something that not only serves your brand but also stands out in my portfolio as a strong example of what I can deliver.

What This Project Is About

You're running a digital marketing agency, and you need a clean, professional website that reflects it. The goal is to create a site that:

- Looks clean and modern
- Clearly communicates what you do
- Builds trust with visitors
- Shows off your past work and your team
- Helps you get leads or inquiries

What I'll Deliver

Here's what I plan t:

- **Homepage** – Clear intro, services overview, call to action
- **About Page** – Your story, team, and values
- **Services** – Details about what you offer
- **Portfolio / Case Studies** – to showcase your past work
- **Testimonials** – past client quotes or reviews for social proof
- **Contact Page** – Form + contact info
- **Mobile-Friendly** – Will look good on phones and tablets
- **Speed Optimized** – So it loads fast

- **Bonuses**:
    - **Basic SEO**
    - **Hosting and Domain name setup support**
    - **Free post launch changes for the first 5 weeks**
    - **Guide on how you can update contents on your site after launch**
    - **Frequent Revisions and Feedback during the development process**

I'll use tools like WordPress + Elementor or Custom Stack, depending on what works best for you.

Timeline

Rough breakdown of how things will go:

Phase	**Time Estimate**
Kickoff & Content Prep	1–3 Days
Drafts	3–4 Days
Build & Test	4–5 Days
Final Feedback + Revisions	2 Days
Final Touches & Launch	2-3 Days

Total: About 2 weeks

Cost

Since this is one of my early projects, I'm offering a fair rate:

Total Price: ETB 7000 / excluding hosting expenses

To keep it simple:

- **2000 upfront** to get started
- **5000 after final delivery**

What I'll Need From You

To get started smoothly, I'll need:

- Your logo + brand colors (or general vibe you want on the site)
- Texts you want on the pages, I can help if needed, but since you're marketers, I trust you'll know how to grab attention :)
- Any photos + videos or any past work you want to feature
- Hosting/domain access if already set up if not don't worry I can help

Why Work With Me?

- I want to do great work that puts both your agency — and myself — on the radar.
- I get how important brand presence is, especially in digital marketing
- I keep things simple, clear, and on schedule
- You'll work directly with me — no middleman, no fluff

Let's Get Started

If this sounds good to you, just say the word and we'll lock it in.

Thanks again — really looking forward to working with you.

Cheers,

Alexander Fisseha
